Neil Marchuk  
Executive Vice President, Human Resources  
TRW Automotive

*Michigan Virtual University*<sup>®</sup> is a not-for-profit Michigan corporation established in 1998 to deliver online education and training opportunities to the citizens of Michigan. It is the parent organization of the *Michigan Virtual School*<sup>®</sup> and *Michigan LearnPort*<sup>®</sup>. *MVU*<sup>®</sup> is governed by a board of directors representing the business and education communities.

# ■ ■ ■ A REPORT TO THE LEGISLATURE ■ ■ ■

Prepared by Michigan Virtual University

December 1, 2010

**T**his report is submitted in compliance with Section 98 (8) of Public Act 110 of 2010, which requires the *Michigan Virtual University*® (*MVU*®) to provide not later than December 1, 2010, a report to the House and Senate Appropriations Subcommittees on State School Aid, the State Budget Director, the House and Senate Fiscal Agencies and the Department of Education, specific information related to the *Michigan Virtual School*® (*MVS*®) for the preceding state fiscal year.

---

## Background

The *Michigan Virtual School* and *Michigan LearnPort* are the core divisions of *MVU*, a 501(c)(3) nonprofit organization that works in partnership with K-12 schools to supplement and expand online learning opportunities. For more than a decade *MVU* has provided leadership to accelerate the adoption and use of online learning within Michigan. Working in partnership with hundreds of Michigan schools, *MVU* offers classes to students and professional development programs for educators through online Web-based services. The *MVS* was created by Public Act 230 of 2000 to serve both traditional and nontraditional students and over the past ten years more than 80,000 course enrollments have been recorded. During 2009-10 the *MVS* had 14,837 course registrations. The *MVS* offers a broad range of core academic courses aligned with state standards, college-level equivalent courses, remedial, enrichment and world language courses, and other innovative online experiences. Other *MVU* services include *Michigan LearnPort*, a statewide Web-based professional development system that provides nearly 700 online courses and training modules for Michigan educators and school employees; and *myDreamExplorer*® (*MDX*) a rich

collection of online career exploration and planning resources that supported over 26,350 middle and high school students during 2009-10.

Funding for the *MVS* is provided through a combination of annual appropriations from the Legislature, reduced course fees charged to enrolling schools and private grant funds. The *MVS* does not grant course credit or award diplomas independently, but works in partnership with local and intermediate school districts which award credit or diplomas. In 2005 the *MVS* was awarded accreditation by the North Central Association Commission on Accreditation and School Improvement (NCA CASI) and the Commission on International and Trans-Regional Accreditation (CITA). Both accreditation organizations are divisions of AdvancED®. In October 2010 the *MVS* completed a rigorous Quality Assurance Review process that is a requirement for renewing and maintaining its approved accreditation status. The *MVS* continues to be recognized as one of the leading and largest virtual schools in the U.S., and it works in collaboration with a national network of K-12 online learning organizations to promote the development of high quality programs and services for students and educators.

## Expanding Educational Opportunities in Michigan

Since beginning its work in 1998 *MVU* has played three key roles to support Michigan's K-12 schools. Figure 1 highlights these distinct, but complementary efforts.

Initially the organization served as a change agent at a time when most school leaders and parents were not familiar with online learning. *MVU* has invested significant time and resources to help create a general awareness of online learning for Michigan's students, parents and educators. The organization has also supported the introduction of online courses in hundreds of individual local schools across the state.

As school leaders developed an appreciation for the value and potential of online instruction, *MVU* became a service provider of high quality online courses and career planning tools. These efforts included helping schools develop local support systems to ensure student success through mentor training, technical support and helpdesk services. *MVU* also introduced innovative online professional development programs and services for all K-12 education personnel. As course enrollments expand *MVU* continues to offer new and effective online services for K-12 schools and educators.

A third role for *MVU* has evolved as schools adopt locally developed online learning programs. For *MVU*, this capacity building role includes helping schools with teacher training, acquiring online content, online assessments, quality assurance, evaluation, infrastructure and technical support services. *MVU*'s statewide outreach activities are designed to help determine how the organization can best support local implementation efforts. This cycle of innovation, quality service and customer support continues to evolve as *MVU* works in collaboration with schools, students and parents.

Figure 1  
Key Roles for Michigan Virtual University

## Scope of the Report

The information provided in this report addresses the six specific requirements that are listed in Section 98 (8) of P.A. 110 of 2010. These items include the schools served by the *MVS*, online course titles available to Michigan schools, course enrollment, registration and completion rates by course, the overall completion rate percentage, grant expenditure information for the period October 1, 2009 - September 30, 2010, and the identification of unmet needs that could be addressed by the *MVS*. Supplemental information is included in this report that summarizes 2009-10 expenditures for two federal grants that support *MVU* online learning programs.

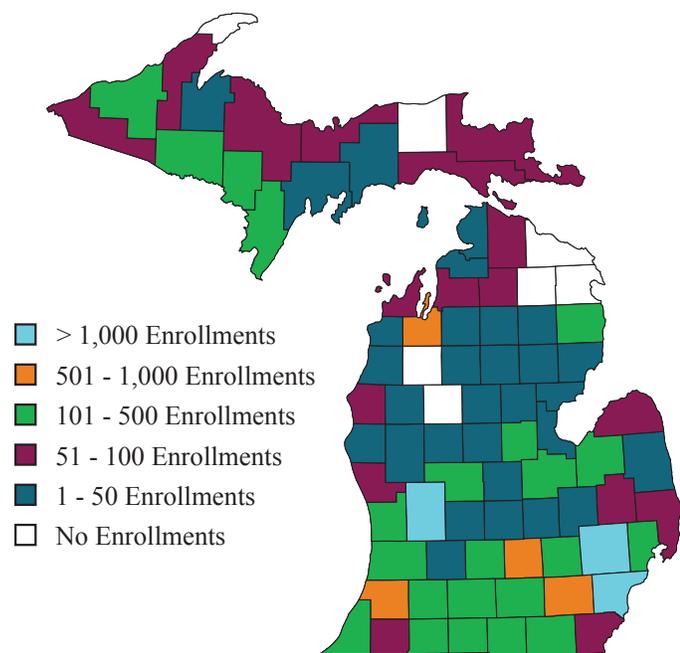

## Michigan Schools Served by the MVS

From October 1, 2009 - September 30, 2010, the *MVS* served students enrolled in 423 Michigan local education agencies (LEAs), public school academies (PSAs), intermediate school districts (ISDs) and nonpublic schools, including schools that have been identified by the Michigan Department of Education (MDE) as not meeting adequate yearly progress (AYP). Figure 2 provides a geographic representation of *MVS* course enrollments by county units for the public and nonpublic schools and home schools that enrolled students during 2009-10.

During this period, schools and families in 76 of the state’s 83 counties were supported with *MVS* online courses and programs.

A complete list of the Michigan schools served during 2009-10 is included in Exhibit 1. In addition, the *MVS* registered 1,530 student enrollments from 946 Michigan home schools during 2009-10. School or district enrollments in *MVS* courses over the past year ranged from a single student enrollment to 417 student enrollments. The average student enrollment per school or district during 2009-10 was 31 students.

**Figure 2**  
2009-10 *MVS* Course Enrollments by County Jurisdictions

**Online Courses Available to Michigan Schools from the *MVS***

Exhibit 2 provides a listing of the online courses offered by the *MVS* to Michigan schools and parents during the period October 1, 2009 - September 30, 2010. These online

courses are listed by the course titles that were included in the *MVS* course catalog for the corresponding fall, spring and summer semesters, as well as three trimesters during the fall and spring. These titles include courses in the content areas of English language arts, mathematics, science, social studies, world languages and other special interest or elective courses such as computer science, career planning and entrepreneurship courses. The list includes 288 possible courses, representing core academic courses that are specifically aligned with the Michigan Merit Curriculum (MMC), Advanced Placement® (AP®) courses, credit recovery courses and summer enrichment experiences for students. These online courses include those developed by *MVS* and courses and content licensed from nationally recognized providers. A majority of the *MVS* courses (79%) are offered at the high school level, but approximately 60 online courses are available for middle school students in grades 6-8.

The adoption of the MMC in 2006 prompted the *MVS* to initiate an intensive two-year course review and revision process to ensure that the online courses support the new curriculum requirements and the corresponding high school content expectations (HSCEs). The *MVS* focused this course review and revision effort in the areas of mathematics, science, English language arts and social studies to assist schools in complying with the state’s new graduation requirements and to help meet the demand for courses and highly qualified instructors in curriculum content areas where teacher shortages have been predicted. Since initial implementation, these courses have been under constant review to improve their instructional design and student success rates. The courses offered through the *MVS* are designed to assist Michigan students in meeting the state’s innovative online learning graduation requirement.

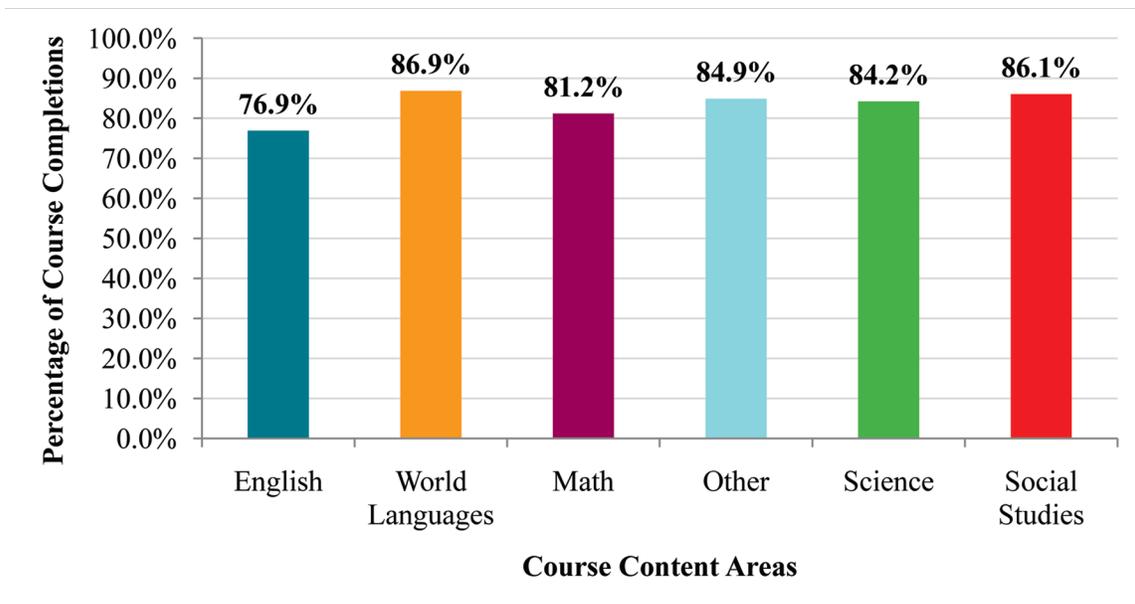

## MVS Online Course Enrollments, Registrations and Completions by Course

The overall average completion rate for the *MVS* courses offered in the fall 2009, spring 2010 and summer 2010 semesters was 84 percent. This includes 12,709 Michigan student enrollments in semester-length instructor-led *MVS* courses and excludes students enrolled in *MVS* summer enrichment programs, ungraded pilot programs or non-instructor-led courses. The *MVS* course completion rate is calculated by dividing the number of enrollments that earned 60% or more of the final points by the number of enrollments that earned 10% or more of the final points. It is a common practice in online learning to drop enrollments with less than 10 percent of the possible points to correct for students who never get going or who had no significant activity in their courses.

Figure 3 provides a summary of the *MVS* course completion rates by curriculum content area. Course completion rates ranged from over 75 percent in English language arts courses, to more than 80 percent in mathematics, science and other elective courses, and to over 85 percent in social studies and world language courses. As previously noted, the category titled “Other” includes elective courses such as Career Planning, Basic Software Applications, Digital Photography, Entrepreneurship and Music Appreciation. The 2009-10 *MVS* student course completion rates by individual course title can be found in Exhibit 3.

**Figure 3**  
2009-10 MVS Average Course  
Completion Rate by Content Area

**Figure 4**  
**Frequency of 2009-10 MVS Students' Final Scores**

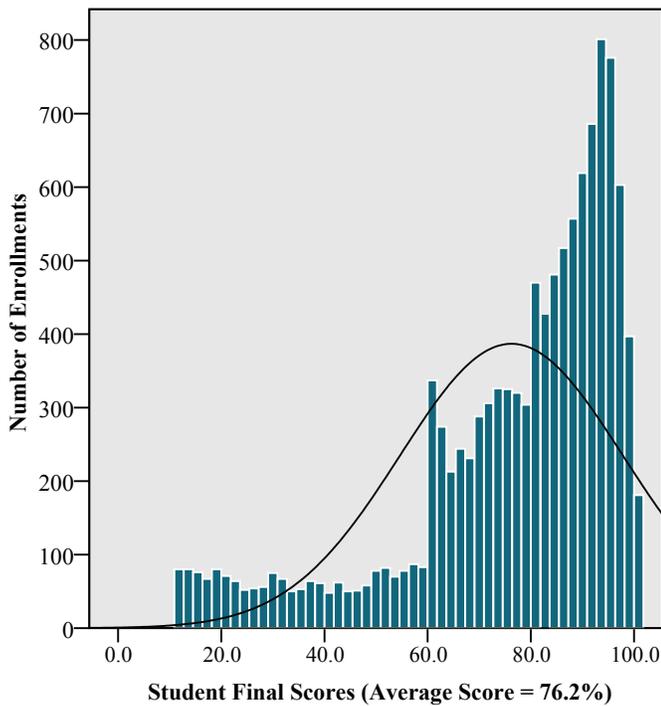

Figure 4 represents the frequency of students' final scores for the 11,526 course enrollments recorded during the 2009-10 school year. The histogram takes into account any student enrollment earning a minimum of 10 percent of the possible points from the 227 courses that schools and students actually selected from the *MVS* course catalog during this period. The 2009-10 school year included a fall, spring, and summer semester, as well as three trimesters offered in the fall and spring.

It is a priority for the *MVS* to provide ongoing support and assistance to the local school mentors, counselors and administrators who are responsible for enrolling students in *MVS* courses. *MVS* student course completion rates continue to increase as a result of improved monitoring and communication, additional student support services and steps taken to streamline the process for formally dropping students from courses they do not intend to complete or actively participate

in. This process is an ongoing challenge because some students start slowly in their online courses and gain confidence in this new learning environment as the semester continues. Schools have made significant strides in developing the local capacity to support and encourage online learners and the *MVS* works with school personnel across the state to minimize the number of incomplete enrollments.

Figure 5 highlights the 10 *MVS* instructor-led core content courses with the highest enrollments and the corresponding student completion rates recorded during 2009-10. These 10 courses represent approximately 13 percent of all *MVS* courses offered during the reporting period.

**Figure 5**  
**Top Ten MVS Core Content Area Courses by Enrollments**

Course Title	Enrollment Totals	Comp %
Forensic Science (Intro.)	288	83.5%
Economics MMC	214	92.5%
Psychology A	207	90.9%
Astronomy	199	89.5%
German 1A	196	80.4%
French 1A	188	87.4%
Civics MMC	173	91.1%
AP Psychology	173	89.3%
Anatomy & Physiology A	170	87.9%
Sociology	161	85.1%
	<b>Total 1,969</b>	<b>Overall Avg. 87.6%</b>

The *MVS* also offered 34 courses during 2009-10 with five or fewer enrollments recorded, including semester or trimester sections of World Geography, Health Education, Basic Software Applications and fourth year French, German and Spanish language courses. The average completion rate for these low

enrollment courses was approximately 80 percent. The *MVS* offers a variety of courses to ensure that a wide range of student interests and needs are met. Michigan school administrators have consistently indicated that the availability of a robust catalog of online courses is especially useful to them as many schools have been forced to eliminate low enrollment course options for students due to increasing instructional costs.

Each year the *MVS* serves a large number of students in credit recovery courses, as well as AP courses, advanced math or science courses or world language courses that are typically not available through their local school. Approximately 36 percent of the 2009-10 *MVS* enrollments can be attributed to the courses not being available locally. In meeting these requests, the *MVS* tends to serve students on each end of the achievement spectrum. During 2009-10 the *MVS* offered 32 AP courses and recorded 934 enrollments. This represents about six percent of the course enrollments during this period. Approximately 21 percent of the 2009-10 *MVS* course enrollments can be attributed to students with credit recovery needs. Many schools in Michigan do not allow students to enroll in online courses that are also offered locally. The exception to this trend tends to be for courses that students have failed in the traditional face-to-face environment. These and other factors contribute to the selection, completion and achievement rates across *MVS* courses. Another element contributing to student success is the essential support role of local mentors who are responsible for assisting students as they access their online courses from a school setting. The *MVS* continues to expand its free mentor training to schools as they develop greater capacity to support online learners in their communities.

### Identification of Unmet Educational Needs That MVU Could Address

Nearly every sector of our economy is turning to information and communications technologies to reduce costs and improve efficiencies. K-12 education is not alone in its need to manage scarce resources, maintain relevance and succeed in today's new global economy.

To date, the education sector has yet to realize the full potential of using technology and the Internet to improve how educators teach and how students learn. This is exacerbated by the fact that Michigan's current school funding model is based primarily on student seat-time, as opposed to demonstrated proficiencies. Over the past decade, *MVU* has developed the technical infrastructure and the capacity to deliver high quality online courses and instructional materials through a cadre of highly qualified Michigan-certified instructors. This has enabled *MVU* to support a broad range of needs facing the state's students, educators and policy makers. As Michigan's state-sponsored virtual school, the *MVS* stands ready to work with K-12 schools and other public and private sector partners to increase high school completion rates, expand world language opportunities, create specialized science, technology, engineering and math (STEM) courses and professional development opportunities, and provide support for Michigan students as they prepare for college. *MVU* has identified four proposals for the consideration of state policy makers to address unmet educational needs and to enhance the growth and development of Michigan's online learning industry.

### 1. Develop Local Capacity to Implement Online and Blended Learning Models

Historically Michigan schools have used online courses, products and services primarily as a supplemental instructional resource. Most K-12 educators have limited experience with teaching in fully online or blended (online and face-to-face) environments. *MVU* is uniquely positioned to work cooperatively with key stakeholder organizations and the K-12 community to develop a more robust statewide online learning capacity building program. This capacity building effort could include helping schools with teacher training, acquiring online content, online assessments, quality assurance measures, student evaluation, and infrastructure and technical support services. A comprehensive statewide capacity building initiative could help all Michigan school districts and public school academies become more effective users of online

learning resources to reduce costs and improve learning outcomes. This statewide initiative could include guidance and effective strategies for using social networking technologies to foster innovation.

## 2. Establish an Alternative Educational Path for Special Student Populations

Online learning can provide a meaningful alternative for students in Michigan who have a need for greater flexibility with their education due to individual learning styles, lack of success with traditional school environments, health conditions, employment responsibilities or a desire to be working early at the college level. However, Michigan's current school funding policy does not empower students and their parents to take advantage of this option. A strategy to expand online learning opportunities for students and parents will require an amendment to the current Michigan School Code to create appropriate incentives for middle and high schools to provide students with expanded access to high quality alternative online courses such as those available from the *MVS*. An alternative path for at-risk students could be selected when one or more of the following conditions exist:

- The student is home schooled or has health issues that prevent regular school attendance;
- The student has failed at least one course at school and has expressed an interest in re-taking the course in an online format;
- The student has an interest in taking a specific course that is not available at their school;
- The student has dropped out of school or has been expelled for disciplinary reasons;
- The student is employed during regular school hours due to family financial hardship.

Creating new options and incentives for students, parents and schools could help reduce dropout rates, support student success, increase high

school graduation levels and open avenues for future educational opportunities.

## 3. Expand Science, Technology, Engineering and Mathematics (STEM) Education Resources

One imperative in the transformation of Michigan's economy is the need for a systematic change in the way that science, technology, engineering and mathematics (STEM) curricula are approached and supported in K-12 schools. It is widely accepted that many of the new jobs that will be created over the next several years will require people with knowledge and skills in these key curriculum areas. *MVU* and other organizations including the Michigan Mathematics and Science Centers Network (MMSCN) have created a partnership to help provide greater access to STEM-related teaching and learning resources for schools, students and families. An innovative proposal being explored is to create a statewide collaborative STEM Center of Excellence to develop and share high-quality specialized online math, science, technology and engineering courses and resources, with associated teacher professional development, all designed to connect the student more directly with STEM applications in the real world. One of the goals is to increase motivation and engagement by providing access to online tools that encourage students to manipulate and experiment with whatever is being studied, and helping teachers increase student achievement.

## 4. Position Michigan as a Leading Global Education Provider in the Knowledge Economy

Access to quality educational services within the K-12 community is no longer exclusively dependent on the availability of local classrooms, textbooks and teachers. A new global market has emerged as parents, schools and youth organizations seek online courses that include rich multimedia content and highly qualified instructors. Michigan has a strategic opportunity to leverage its nationally recognized teacher preparation leadership role through the development of an initiative to help prepare the next generation of teachers to become tech-savvy

online instructional experts. Today, too many teacher education graduates are leaving Michigan in order to find employment in the teaching profession. Michigan's teacher preparation institutions should place a higher priority on preparing tomorrow's educators to teach in virtual environments. As skilled online instructors, new teachers could choose to stay in Michigan and teach students around the globe via the Internet. *MVU* currently operates one of the largest virtual schools in the U.S. and has more than a decade of experience developing and delivering innovative online courses to K-12 schools. Building on previous strategic investments, Michigan has an opportunity to export high quality online K-12 educational services to other states and nations.

### Summary of DED-OESE, Title IIA Teacher Quality Grant and DED-OESE, Title IID Education Technology Grant Expenditures

The *MVU* receives annual Legislative appropriations through two federal grant programs to support online learning in Michigan schools. The Title IIA Teacher Quality Grant provides funding to support *Michigan LearnPort*, a statewide communication and professional development portal developed in partnership with the MDE to serve Michigan educators and members of the K-12 community. *Michigan LearnPort* is redefining how professional development services are delivered by making effective use of innovative Web-based tools and resources.

The Title IID Enhancing Education Through Technology Grant provides funding to build *MVU*'s statewide capacity for providing high quality online services and delivering courses and instruction in

innovative ways to nontraditional K-12 audiences. The Title IID Grant enables the *MVS* to provide no-cost course scholarships for students to expand enrollments in online courses in Michigan schools, including schools that have been identified for improvement or corrective action. During 2009-10 the *MVS* worked in partnership with several intermediate school districts to expand online learning opportunities. Grant expenditure summary information for both grant programs for 2009-10 is included as Supplemental Information in Exhibit 4.

### Conclusion

At a time when new investments in K-12 education system are not likely, Michigan's schools must meet the challenges of improving student achievement at all grade levels and increase graduation rates with fewer financial resources. The potential reach and impact of online learning is growing and it represents a key component of our current education system and an area for significant development in the future. Expanding Michigan's leadership role in online education can enhance educational quality and support the state's long-term economic development strategy. The transition of learning environments from traditional classroom models to multimedia rich online courses and resources will require the transformation of both individual and organizational behavior. *MVU* stands ready and looks forward to working with the state's policy leaders and elected officials to develop Michigan's online learning industry and to help position the state to assume a national leadership role in the knowledge economy.

---

### MVU Vision

To provide leadership by expanding, improving and innovating learning opportunities for K-12 students and educators.

### MVU Mission

To serve as a catalyst for change by providing quality Internet-based programs that strengthen teaching and learning for K-12 education.

*Michigan Virtual University* is an equal opportunity employer. It is *MVU*'s policy to carefully select, hire, retain and promote the best-qualified individuals. To this end, *MVU* will not discriminate against individuals because of their race, age, sex, religion, sexual preference, national origin, height, weight, non-disqualifying disability or marital status in the terms, conditions and benefits of employment.

## Exhibit 4 Summary of Grant Expenditures

### MICHIGAN VIRTUAL UNIVERSITY

Title IIA, Teacher Quality Grant (in support of *Michigan LearnPort*)

Expenditures from October 1, 2009 - September 30, 2010

Software Customization	\$188,382.91
Web hosting and Technical Support	52,449.17
Equipment Expenditures	28,313.00
Content Development Consultants	9,468.36
Licensing Expenditures	276,477.90
Instructor Consultants	64,900.00
Teacher Stipends	34,800.00
Media Asset Development	1,716.68
Communication and Outreach	52,008.56
Mi Champions Sponsorship	166,000.00
Algebra for All	376,975.10
Salaries and Benefits	618,088.54
Administration	171,431.32
<b>TOTAL</b>	<b>\$2,041,011.54<sup>1</sup></b>

All Title IIA expenditures approved by MDE through a cooperative agreement.

### Title IID, Education Technology Grant (in support of *Michigan Virtual School*)

Expenditures from October 1, 2009 - September 30, 2010

High School Course Scholarship Support	\$ 705,799.95
Improvement of Instruction: Staff and Instructor Training	106,730.78
Professional Development Infrastructure	66,150.41
Researcher Fees and Related Exp.	31,129.00
E-Learning Consortium Related Project Staff Costs	3,068.57
<b>SUBTOTAL</b>	<b>912,878.71</b>
<b>INDIRECT COSTS:</b>	
Ingham ISD Indirect Portion	65,421.00
Ingham ISD Professional Development Portion	50,000.00
<b>TOTAL</b>	<b>\$1,028,299.71<sup>2</sup></b>

<sup>1</sup> Total includes \$958,961 of Title IIA carryover from the 2008-09 grant.

<sup>2</sup> Total includes \$63,733 of Title IID carryover from the 2008-09 grant.
